Mark Scheme (Results)

October 2020

Pearson Edexcel International Advanced Level
In Accounting (WAC12/01)

Paper 1: Corporate and Management Accounting

Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

Question Number	Answer	Mark																								
1(a)	<p>AO1 (6) AO1: Six marks for correct calculation of market value of company.</p> <p style="text-align: center;">Calculation of value of Tyche Insurance plc</p> <table border="1" style="margin-left: auto; margin-right: auto;"> <thead> <tr> <th></th> <th>(£000)</th> <th></th> </tr> </thead> <tbody> <tr> <td>Book value of company</td> <td>13 800</td> <td>(1)AO1</td> </tr> <tr> <td colspan="3">Revaluations</td> </tr> <tr> <td>Property</td> <td>1 850</td> <td>(1)AO1</td> </tr> <tr> <td>Computers</td> <td>(600)</td> <td>(1)AO1</td> </tr> <tr> <td>Fixtures and fittings</td> <td>(220)</td> <td>(1)AO1</td> </tr> <tr> <td>Inventory</td> <td>(40)</td> <td>(1)AO1</td> </tr> <tr> <td>Market value of company</td> <td>14 790</td> <td>(1o/f)AO1</td> </tr> </tbody> </table>		(£000)		Book value of company	13 800	(1)AO1	Revaluations			Property	1 850	(1)AO1	Computers	(600)	(1)AO1	Fixtures and fittings	(220)	(1)AO1	Inventory	(40)	(1)AO1	Market value of company	14 790	(1o/f)AO1	(6)

Question Number	Indicative Content	Mark
1 (g)	<p>AO1 (1), AO2 (1), AO3 (4), AO4 (6)</p> <p>Answers may include:</p> <p><u>Offer from Zeus plc</u> <u>Case For</u> This offer is wholly in cash. Shareholders in Tyche Insurance plc will be certain of the amount they will receive.</p> <p>Shareholders could invest this cash elsewhere if they wanted to or they could spend the cash.</p> <p>The offer is from a bank. This may result in lateral economies of scale which would benefit Zeus plc and their shareholders in the future.</p> <p><u>Case Against</u> The offer is less than the offer from Apollo plc. It is £400 000 less than Apollo's offer.</p> <p>Cash will go down in value in real terms due to inflation.</p> <p>There is no statement of financial position of Zeus available to view.</p> <p><u>Offer from Apollo plc</u> <u>Case For</u> The offer is greater than Zeus plc by £400 000. This offer is £17 900 000 and Zeus is only £17 500 000.</p> <p>The offer is in shares of Apollo plc. The offer is based on the market price. The shares could go up in value, which means the shareholders make further gains.</p> <p>Shares in Apollo plc may pay out dividends in the future.</p> <p>The offer is from another insurance company. This should ensure horizontal economies of scale which will benefit Apollo plc and their shareholders in the future.</p> <p><u>Case Against</u> The offer is in shares of Apollo plc. The offer is based on the market price. The shares could go down in value, which means the shareholders will lose out.</p> <p><u>Decision</u> Shareholders made the correct decision accepting the offer from Apollo plc as it was a higher offer and there appears to be potential for economies of scale, capital growth and future dividends.</p>	(12)

Level	Mark	Descriptor
	0	A completely incorrect response.
Level 1	1-3	Isolated elements of knowledge and understanding that is recall based. Weak or no relevant application. Generic assertions may be present.
Level 2	4 - 6	Elements of knowledge and understanding that are applied to accounting. Chains of reasoning are present, but may be incomplete or invalid. A generic or superficial assessment is present.
Level 3	7 - 9	Accurate and thorough understanding, supported throughout by relevant application, maybe to the scenario. Some analysis perspectives are present, with developed chains of reasoning, showing causes and/or effects. An attempt at an assessment is presented, using financial information in an appropriate format and communicates reasoned explanations.
Level 4	10 - 12	Accurate and thorough knowledge and understanding, supported maybe by relevant and application to the scenario. A coherent and logical chain of reasoning, showing causes and effects. Assessment is balanced and wide ranging and well contextualised, using financial and perhaps non-financial information, and makes an informed conclusion.

Question Number	Answer	Mark
2 (a)	AO1 (4) AO1: Four marks for correct calculation of annual production in therms.	(4)

Gas Production	Archton	East Downs	Kingham	Waverley
Annual production (therms)	138 700(1) AO1	116 800 (1) AO1	156 950 (1) AO1	98 550 (1) AO1

Question Number	Answer	Mark
2 (b)	AO1 (2), AO2 (4), AO3 (4) AO1: Two marks for correct inclusion of managers salaries and totalling of fixed costs. AO2: Four marks for correct calculation of depreciation for each site. AO3: Four marks for correct calculation of head office costs.	(10)

	Archton		East Downs		Kingham		Waverley	
Managers Salaries	47 000		44 000		82 000		38 000	(1) AO1 All 4
Head Office Overheads	600 000	(1) AO3	400 000	(1) AO3	600 000	(1) AO3	200 000	(1) AO3
Depreciation	<u>160000</u>	(1) AO2	<u>136000</u>	(1) AO2	<u>200000</u>	(1) AO2	<u>128000</u>	(1) AO2
Total Fixed Costs	807 000		580000		882 000		366 000	(1o/f) AO1 All 4

Question Number	Answer	Mark
2 (c)	<p>AO1 (9), AO2 (4)</p> <p>AO1: Nine marks for correct calculation of sales revenue, inclusion of direct materials, direct labour, other variable costs, fixed costs and totalling costs.</p> <p>AO2: Four marks for correct calculation of profit or loss for each site.</p>	(13)

	Archton		East Downs		Kingham		Waverley	
Therms per year	138700		116800		156950		98550	
Revenue (Sales)	9431600	(1o/f) AO1	7942400	(1o/f) AO1	10672600	(1o/f) AO1	6701400	(1o/f) AO1
<u>Costs</u>								
Direct materials	5409300		4788800		6278000		3646350	(1) AO1 - all 4
Direct labour	2912700		2102400		2982050		1675350	(1) AO1 - all 4
Other variable costs	1803100		1284800		1412550		985500	(1) AO1 - all 4
Fixed costs	<u>807000</u>	-	<u>580000</u>	-	<u>882000</u>	-	<u>366000</u>	(1o/f) AO1 - all 4
Total costs	10932100		8756000		11554600		6673200	(1o/f) AO1 - all 4
Profit (Loss)	(1500500)	(1o/f) AO2	(813600)	(1o/f) AO2	(882000)	(1o/f) AO2	28200	(1o/f) AO2

Question Number	Answer	Mark
2 (d)	<p>AO1 (1), AO2 (13), AO3 (2)</p> <p>AO1: One mark for correct inclusion of revenue per therm.</p> <p>AO2: Thirteen marks for correct calculation of direct materials, direct labour, other variable costs, and total variable costs for each site, per therm.</p> <p>AO3: Two marks for correct calculation of contribution per therm.</p>	(16)

Per therm	Archton		East Downs		Kingham		Waverley	
Revenue (Sales)	68		68		68		68	(1) AO1 -all 4
Direct materials	39	(1o/f) AO2	41	(1o/f) AO2	40	(1o/f) AO2	37	(1o/f) AO2
Direct labour	21	(1o/f) AO2	18	(1o/f) AO2	19	(1o/f) AO2	17	(1o/f) AO2
Other variable costs	<u>13</u>	(1o/f) AO2	<u>11</u>	(1o/f) AO2	<u>9</u>	(1o/f) AO2	<u>10</u>	(1o/f) AO2
Total variable costs	73		70		68		64	(1o/f) AO2 -all 4
Contribution	-5		-2	(1o/f) AO3 both	0		4	(1o/f) AO3 both

Question Number	Indicative Content	Mark
<p>2 (e)</p>	<p>AO1 (1), AO2 (1), AO3 (4), AO4 (6) Answers may include:</p> <p><u>Future of Archton</u> Revenue per therm does not cover variable costs. The government subsidy of £2 per therm next year will not make any difference, revenue per therm will still not cover variable costs. Marginal costing theory says the field should be shut down now.</p> <p><u>Future of East Downs</u> Revenue per therm does not cover variable costs. Marginal costing theory says the field should be shut down now. However, the government subsidy of £2 per therm will mean, revenue per therm will equal variable costs. The field could continue in the short term. However, when fixed costs are taken into account the field makes a loss in the long term and should close down.</p> <p><u>Future of Kingham</u> Revenue per therm is equal to variable costs. Marginal costing theory says the field could continue in the short term, but not the long term. However, the government subsidy of £2 per therm will mean revenue per therm will cover variable costs next year. But £2 per therm means a subsidy of £313 900 which does not cover the loss of £882 000. So, in the long term, this field should close down.</p> <p><u>Future of Waverley</u> Revenue per therm does cover variable costs. Marginal costing theory says the site should continue to operate in the short term. The government subsidy of £2 per therm will not make any difference, revenue per therm will still cover variable costs. This field makes an overall profit and should continue in the long run.</p> <p><u>Head Office costs</u> It is worth noting that head office costs may not reduce in proportion to the ratio given. Eg if Archton closes down, there may not be a reduction in Head Office costs of £600 000. It may be that other fields see an increase in the apportionment of Head Office costs. This may alter the decision whether the field should stay open or close in the long run.</p>	<p style="text-align: right;">(6)</p>

Question Number	Indicative Content		Mark
3(c)	<p>A02 (1), A03 (2), A04 (3)</p> <p><u>For the debenture being the most beneficial</u> The interest rate is lower than the bank loan by 2.5%. This means in a year the interest paid will be £82 500 lower than the bank loan.</p> <p>The interest payments are likely to be paid every six months, rather than monthly. The non-payment of interest for five months may help the cash flow of Negombo plc, especially if their sales are seasonal.</p> <p><u>For the bank loan being the most beneficial</u> The loan is loan for five years, not ten. The total interest paid is lower with the bank loan. The bank loan pays £288 750 per year for five years which is £1 443 750 in total. The debenture pays £206 250 per year for ten years which is £2 062 500 in total The bank loan pays £618 750 less in total.</p> <p>The interest payments will be paid every month, rather than every six months. The payment of smaller interest amounts every month may help the cash flow of Negombo plc, rather than pay one large sum every six months.</p> <p>The bank loan may be quicker and easier to arrange.</p> <p><u>Decision</u> There is a strong argument for stating the bank loan is better, as the total interest paid is lower than the debenture. Or, debenture is better as there is a smaller annual outflow of cash, reducing the drain on cash</p>		(6)

Question Number	Indicative Content	Mark
<p>5 (b)</p>	<p>AO2 (1), AO3 (2), AO4 (3)</p> <p>Ways to increase earnings per ordinary share:</p> <p><u>Increase net profit.</u> Numerous ways to do this, under the general headings of increasing revenue and/or decreasing costs. For example, Bogra could run a marketing campaign to increase revenue and negotiating a discount on purchases could decrease costs. This method would be approved by Bogra shareholders and the stock market and is probably the best method.</p> <p><u>Reduce interest payments</u> Bogra could reduce borrowings, by paying off loans etc. However the company would need to ensure they have enough liquid funds for this. This method would be approved by shareholders and the stock market and is a good method.</p> <p><u>Reduce taxation</u> Accountants or the finance department of Bogra could find ways of reducing the tax bill of the company. For example they could move the company base to a low-tax location. This would not be popular with the public of the country the company is based in now.</p> <p><u>Reduce number of ordinary shares issued.</u> Bogra could redeem some ordinary shares. However, the company would need to ensure they have the liquid funds to do this and not drain liquid resources. Those shareholders who have to sell the shares may not like this approach. It may also make Bogra look a smaller company. It would also increase the gearing ratio.</p> <p><u>Decision</u> Increasing net profits is probably the best way to increase earnings per share.</p>	<p style="text-align: right;">(6)</p>
